BrassRing ATS August'22 Release

BrassRing ATS new features for release 22.08.16 are listed here.

BrassRing ATS Client Reminders

The Client Reminders section reminds clients of recently distributed important notices and links to comprehensive documentation and training for the special features recently introduced.

Talent Gateways - User Experience Guidelines

Talent Gateways are optimized for excellent candidate experience, per years of guidance and inputs from user experience designers. Clients who have customized their Talent Gateways in the Visual Branding Tool should be mindful of the following:

- **Custom colors** can result in low-contrast text or link content, a problem for color-blind candidates. Custom Talent Gateway colors should be reviewed and adjusted, if needed, to ensure adequate contrast per the WCAG guidelines. There are numerous contrast checker tools available online; for example, <https://webaim.org/resources/contrastchecker/>
- **Custom CSS** which hides lines or elements of the Talent Gateway can result in contrast/accessibility issues or hidden/ blocked functionality, which can deteriorate the candidate experience. Any Talent Gateway with custom CSS should be fully reviewed by the client for accessibility compliance, as well as ensuring that no functionality is hidden/blocked unintentionally.
- In addition, Signal Labs Talent is committed to continuous improvement and releases UI as well as functionality features regularly. Clients with CSS should be verifying their Talent Gateway User Interface for **each new release** in Staging during the one-week window before the release to Production, to avoid any disruption to the candidate experience (in Production). In case an issue is discovered, where possible, clients should update their CSS in Staging and Production (where not possible, they should report via Salesforce).

Clients are reminded of the HR Status Mapping required to have been completed in order for the candidates to see important submitted application detail, including filter by status and the application details page (status progress bar, application record, posted interviews, documents, or forms). As of 2022, there are 10+ clients that have not yet completed this. Refer to the View or Edit HR Status Categories section on this Knowledge Center page.

Refer to the [Browser Support section](#) of the Knowledge Center for more information.

Classic Basic Talent Gateways

Several years ago the Classic Talent Gateway functionality was retired and only Responsive Talent Gateways have since been supported. During this release, as previously announced, all the classic Basic Talent Gateways are inactivated.

RTC internal reference # 306578.

Ideas - You Asked We Listened

We are proud to inform you that this build introduces features that were developed in response to clients' Ideas (previously known as Requests for Enhancement (RFEs)). Signal Labs is pleased to deliver these features in response to your responses and comments.

Ideas

The following features were delivered in response to the Ideas posted on Aha!

- Workbench Audit Trail

BrassRing ATS Dark Launch Features

Dark Launch features are those features that are released to the Staging environment only and are NOT released to the Production environment for a considerable amount of time.

This process gives an opportunity and enough time to test these features thoroughly before they are available in the production environment. Clients are requested to configure and test these features and provide their feedback and inputs to your respective Signal Labs representatives.

There are no Dark Launch Release features for the current release.

BrassRing ATS Visible Changes

The BrassRing ATS visible changes for the current release are listed here.

Talent Gateway SSO Profile Import - Preferred Given Name

Starting this release candidate's preferred given name field can be added to the Talent Gateway Single Sign On (SSO) Profile import.

Starting this release, clients can pre-populate the Preferred Given Name information into the candidate's Talent Gateway profile via profile import and also set the desired access modifier as it is done for the other contact fields (i.e FirstName, LastName, etc).

Here is the new XML tag and node sequence within Profile XML format.

```
<PersonName>
  <GivenName>Christopher</GivenName>
  <PreferredGivenName>Chris</PreferredGivenName>
  <MiddleName>Ezekiel</MiddleName>
  <FamilyName>Thompson</FamilyName>
</PersonName>
```

RTC internal reference # 309330.

BrassRing ATS Configurable Changes

There are no BrassRing ATS configurable changes for the current release.

BrassRing ATS Workbench Changes

The Workbench changes for the current release are listed here.

Workbench Audit Trail - Enhanced Features

The Audit Trail feature present in the Workbench is now extended to all Workbench modules. Every module that allows users to make configuration-related changes now displays an Audit Trail link. When users select the Audit Trail link, it opens the audit trail record for that specific configuration item, and users can now add a note. **Reason For Change** is a new text box added to the Audit trail section that allows users to add a description of why they have made a specific change.

This feature helps clients with change management. It provides a log and acts as a reminder about a change made by a user by providing a summary description of the changes they made in the Workbench at a specific time.

Users can edit the text description they have added at any point in time. Users can view the text that is added by other users. The users with access type **Power User 5** have the privilege to edit text added by other workbench users.

Audit Trail workflow in the Admin menu of Workbench now displays this new value **Reason for change** and is now a part of the Export to excel functionality.

Figure 1. Audit Trail with Reason For Change field

Audit trail					
Showing 1 record					
Date Changed	Record	Action	Name	Changed From	Reason For Change
11 Aug 2022 03:16:03	Auto req ID	Edited		Workbench	+

Close

New field Reason for change added to the Audit Trail.

Figure 2. Text Box - Reason For Change

Audit trail					
Showing 1 record					
Date Changed	Record	Action	Name	Changed From	Reason For Change
11 Aug 2022 03:16:03	Auto req ID	Edited		Workbench	Updated Help text

Close

Users select the plus icon to open a text box where they add the description of the reason for change

Figure 3. Reason For Change Displayed in Audit Trail

Audit trail					
Showing 1 record					
Date Changed	Record	Action	Name	Changed From	Reason For Change
11 Aug 2022 03:16:03	Auto req ID	Edited		Workbench	Updated Help text

Close

As the user saves the description it is displayed with a pencil icon in the audit trail. Users that added the text can come back and edit the description at any time.
