BrassRing ATS May'23 Release

BrassRing ATS new features for release 23.05.02 are listed here

BrassRing ATS Client Reminders

The Client Reminders section reminds clients of recently distributed important notices and links to comprehensive documentation and training for the special features recently introduced.

BrassRing ATS Dark Launch Features

Dark Launch features are those features that are released to the Staging environment only and are NOT released to the Production environment for a considerable amount of time.

This process gives an opportunity and enough time to test these features thoroughly before they are available in the production environment. Clients are requested to configure and test these features and provide their feedback and inputs to your respective Signal Labs representatives.

BrassRing ATS - New User Experience

It is time to bring in some freshness in design, ease of use, and seamless connectivity and navigation through various modules of BrassRing ATS. Please read this [article](#) to find what are the latest changes we have made keeping you, the user in mind!

The new user experience boasts some great features such as:

- Choice of Widgets on the home page.
- Data Visualization.
- Talent Record redesign.
- Dynamic action bars.

This feature is available based on user type configuration. Please refer to the configuration section of the New User Experience guide for help with configuration.

This feature is available in **the Staging environment only** starting this release. Clients may configure this feature for their users, test the features in staging, and provide feedback and inputs to your respective Signal Labs representatives.

BrassRing ATS Visible Changes

The BrassRing ATS visible changes for the current release are listed here.

Talent Gateway - Passcode Expiry Duration Update

Starting this release, the expiration time of the passcode for resetting the password of a candidate's profile on the Talent Gateway is changed from 20 minutes to 10 minutes.

The email sent to the candidate specifies that the passcode is valid only for 10 minutes.

RTC internal reference # 311035.

BrassRing ATS Configurable Changes

The BrassRing ATS configurable changes for the current release are listed here.

BrassRing ATS Workbench Changes

The Workbench changes for the current release are listed here.

Publish - Additional Client Settings Available

Starting this release, the client settings below are added to the existing list that is available for 'publish' through Task Manager/Client Settings in Workbench.

Workbench Path: **Tools > Task Manager > Publish - any Functional area**

In the task manager/ client settings publish:

1. Publish Functional Area(s) -> Client Settings -> All is selected, these client settings will also be published from source to target.
2. Publish Functional Area(s) -> Client Settings -> List -> These client settings will appear for selection and will be published from source to target when selected.
3. If any other function area that has a dependency on these client settings is published then these client settings are also published from source to target.

This change will be included in :

1. Cross Environment Publish
2. Cross-client publish
3. New client creation

List of newly available client settings for Publish.
