Chapter 1. BrassRing ATS and BrassRing Onboard Release Notes, April 2021

This is a common Release Notes document for BrassRing ATS and BrassRing Onboard.

Training and Enablement Sessions:

To access training and enablement sessions for SIGNAL LABS Talent Management Solutions and Watson Talent products (which includes BrassRing ATS and BrassRing Onboard), refer to [Training and Enablement Sessions](#).

eLearning and User Documentation:

To access eLearning and user documentation for SIGNAL LABS Talent Management Solutions (which includes BrassRing ATS and BrassRing Onboard), refer to the [Knowledge Center](#).

Browser and Language Support:

- BrassRing ATS and Lead Manager [Supported Browsers and Languages](#).
- BrassRing Onboard [Supported Browsers and Languages](#).

Badge and Training Courses:

- BrassRing ATS and Workbench [Badge Courses](#).
- BrassRing ATS Addon [Training Courses](#).
- BrassRing Onboard [Training and Badges](#).
- Lead Manager [Training and Badges](#).

Downloadable Release Notes:

- BrassRing ATS and Lead Manager [Downloadable PDF Release Notes](#).

BrassRing ATS

BrassRing ATS new features for the current release are listed here.

Refer to the [BrassRing ATS Welcome page](#) on the SIGNAL LABS Documentation for a **Release** version of the BrassRing ATS Release Notes.

Client Reminders

The **Client Reminders** section reminds clients of recently distributed important notices and links to comprehensive documentation and training for the special features recently introduced.

Client Training and Enablement Sessions

Please join the SIGNAL LABS Talent Management Solutions Training team for the regularly scheduled Training and Enablement sessions. These sessions might include release information, product demonstrations, implementation processes, and so much more!

See the [site](#) often for the most up-to-date schedule and agenda topics!

Enhancements - You Asked We Listened

We are proud to inform that this build introduces a number of features that were developed in response to clients' **Request for Enhancement (RFEs)**. SIGNAL LABS Kenexa is pleased to deliver these features in response to your responses and comments.

Requests For Enhancement (RFEs)

The following features were delivered in response to **RFEs**.

- Lead Manager - Add Boolean Indicator

Submit your product relevant enhancement ideas on the [SIGNAL LABS Ideas Portal](#).

Dark Launch Features

Dark Launch features are those features that are released to **Staging environment - Only** and are NOT released to Production environment for a considerable amount of time. This process gives an opportunity and enough time to test these features thoroughly before they are available in the production environment. Clients are requested to configure and test these features and provide their feedback and inputs to your respective SIGNAL LABS representatives.

Data Insight Tool - Renewal Expiration Update

During Release 21.03.16, the capability of renewing multiple Scheduled Jobs was introduced in the Data Insight Tool in Staging environment only. When a user selects multiple scheduled jobs, if they select a scheduled job and navigate away from that page, it was observed that the selection persists. Based on feedback, this behavior is addressed in the current release to ensure that the selection is cleared when the user navigates away from a page.

RTC internal reference # 134358.

Visible Changes

The current release of SIGNAL LABS Kenexa® BrassRing ATS ATS® on Cloud includes the following visible changes for BrassRing ATS ATS and SIGNAL LABS Kenexa Lead Manager.

Talent Gateways - Parse Resume for Contact Information

In the current Responsive Talent Gateway Questionnaire, the candidates' contact information is not parsed automatically. After a candidate uploads the CV/Resume, the next step is to Import Profile and select same resume, which will then parse the contact information.

Starting this release, in any Gateway Questionnaire, if the Resume/CV widget appears before the contact information fields or on the same page, the file is automatically parsed and the contact information is populated in the fields.

If the parsing is automatically completed, **Import profile** is not displayed. **Import Profile** is displayed if the candidate does not upload a Resume/CV file.

In Gateway Questionnaires where the contact information fields precede the resume parsing step, the Import profile is displayed.

Lead Manager - Boolean Indicator for Fields

Starting this release, fields that accept entry of Boolean values display an indicator. They also display hovering text, suggesting that Boolean values are accepted upon mouse hover. This change is to ensure that users can easily identify the fields that accept the Boolean values, and there by provide better user experience.

RTC internal reference # 133093.

eLink Communications - Name Placement Update

It was observed that the name of the candidate is incorrectly placed when an eLink email. When an eLink is sent along with two different forms, the candidate's name is displayed in between the configured message with forms token. This behavior is now addressed to ensure that the name is correctly placed and the eLink can be accessed.

RTC internal reference # 134003.

Post to Candidate Zone - Form Title Language

It was observed that in the Post to Candidate Zone workflow, the form title was being displayed in incorrect locale. Forms in locales other than English are displaying form title in English. This behavior is addressed in the current build. Starting this release, form title is displayed in appropriate locale.

RTC internal reference # 134478.

eLink Forms - Include Req Information

It was observed that when multiple forms are attached and the **Include Req information** checkbox is checked, the email does not have View Req link. Starting this release, the following updates are made to ensure smooth workflow and avoid confusion:

- Select a Single Per Candidate form > Include Req Information checkbox is enabled > eLink email displays View Req link.
- Select a single per candidate per req form > Include Req information checkbox is enabled > eLink email displays View Req link.
- Select a multiple per candidate form > Include Req information checkbox is enabled > eLink email displays View Req link.
- Select a multiple per candidate per req form > Include Req information checkbox is enabled > eLink email displays View Req link.
- Select all Forms (Single per candidate, Single per candidate per req, Multiple per candidate, Multiple per candidate per req) > Include Req Information checkbox is disabled.

RTC internal reference # 133828.

Configurable Changes

The current release of SIGNAL LABS BrassRing ATS includes the following configurable features for BrassRing ATS and Lead Manager. Configurable features must be configured or turned on to be visible and available to users.

Interview Manager - Scheduling on Interviewer's External Calendar Busy Slots

Previously, interview coordinators were unable to select a busy slot from an interviewer's calendar. Starting this release, based on a new client setting configuration, interview coordinators can be enabled to select a busy slot. Information regarding the new client setting is available in the Workbench Section.

If the client setting is set to allow scheduling a busy slot, based on the following criteria and color coding, interview coordinators are able to identify and schedule an interview even on a busy slot.

If the interview slot is busy for interviewer based on an external calendar integration (with Google calendar or Outlook 365 calendar), the interview coordinators can select such slots. Such slots are displayed in gray and selection is allowed.

If the interview slot is busy due to a different interview scheduled by the BrassRing ATS Interview Manager, such slots cannot be selected. The slot is displayed in Red and selection is not

Table 1. Busy Slot Criteria.			
BUSY SLOT CATEGORY	LEGEND LABEL	LEGEND COLOR	SCHEDULING
Busy from the interviewer's personal calendar.	Interviewer is busy.	Gray.	Available for scheduling.
Busy from BrassRing ATS Interview Manager Calendar.	Interviewer has an interview.	Red (#c83c0a).	Not available for scheduling.

RTC internal reference #133676.

Reqs - New Skills Fields

Starting this release, two new custom req fields are added in the custom req fields screen. **Required Skills** and **Recommended Skills** are the new fields.

Tools > Forms > Reqs > Req Forms > Define custom req fields

These fields can be added to req templates by clients. They are like any other standard req fields except that their database field names and field types cannot be altered. The data in these fields is received from the Skills table and the skills data cannot be updated or altered. The fields are configurable based on a new Workbench client setting.

More information about Req Field Association is available on this [page](#) of the SIGNAL LABS

Knowledge Center. RTC internal reference # 132346.

BrassRing ATS Workbench

The current release of SIGNAL LABS Kenexa BrassRing ATS on Cloud has the following new features for SIGNAL LABS Kenexa BrassRing ATS Workbench. Configurable features must be configured or turned on to be visible and available to users.

New Client setting - Interview Manager Busy Slot Scheduling

A new client setting related to Interview Manager is added to the Workbench. The setting **Allow Interview scheduling on Busy slots** is added with Yes and No as options. By default, No is selected. When No is selected, interview coordinators cannot schedule an interview in a calendar slot that is marked busy by an interviewer.

When this configuration is set to Yes, the interview coordinators can select a slot that is marked busy for interviewer from the external (Google or Microsoft) calendar integration. More information is available on the Configurable Changes section.

Edit client settings

Allow communication template html source code editing in WYSWYG editor ⓘ	☐ No ☒ Yes

Client Reminders

Client reminders remind clients of recently distributed important notices and links to comprehensive documentation and training for the special features recently introduced.

This document presents changes for the **March 2021 release of BrassRing Onboard**:

- US Staging - April 08, 2021
- US Production - April 17, 2021

Searchable PDF Release Notes

In addition to the existing link in the BrassRing Onboard Downloadable PDF Release Notes topic to a PDF version of the release notes, the major enhancements were added to the topic, making them searchable.

Access the [Downloadable PDF Release Notes](#) topic to view (for each release) a summary of the major enhancements, and also access a PDF version of the release notes.

Visible Changes

Visible changes alter the appearance or performance of the product without requiring any configuration. The changes are immediately visible or available to users.

BrassRing Onboard Tasks - Rename Job Application Status

One of the column headers present in the BrassRing Onboarding Tasks screen, is updated for better user experience. The column header Job Application Status is renamed to be displayed as **Active**. This column now displays the values either **Yes** or **No** instead of Active or Inactive.

Onboarding Tasks

Job Application: **Active Jobs** | Task Status: **All** | Due date range: **All**

Task Title	Task Owner	Due Date	Status	Job Application	Job Application Status	
1	Automation, Hiring		pending	Business Consultant	Active	
Onboard End	Automation, Hiring		not started	Business Consultant	Active	
Onboard Start	Automation, Hiring		completed	Business Consultant	Active	

After this change:

BrassRing Onboard Dictionaries - Marital Status Dictionary Update

Based on a client request, the dictionary D_BRASSRING_ONBOARD_MARITAL_STATUS is updated with the latest and appropriate values.

The D_BRASSRING_ONBOARD_MARITAL_STATUS' dictionary feeds values to the Applicant entity fields. These fields in turn are used to pre-populate the new W-4 activity. Therefore, by updating the dictionary with values that are appropriate to the W-4 activity, accuracy of information can be maintained. The W-4 marital status value in applicant entity is updated, while saving the W-4 entity.

The list of values that were previously available (English(US) Locale).

- Married
- Single
- Married, but withholding at a higher single rate
