Chapter 1. BrassRing ATS ATS and BrassRing ATS BrassRing BrassRing Onboard Release Notes, February 2020

This is a common Release Notes document for BrassRing ATS ATS and BrassRing ATS BrassRing BrassRing Onboard.

Training and Enablement Sessions:

To access training and enablement sessions for SIGNAL LABS Talent Management Solutions and Watson Talent products (which includes BrassRing ATS ATS and BrassRing ATS BrassRing BrassRing Onboard), refer to [Training and Enablement Sessions](#).

eLearning and User Documentation:

To access eLearning and user documentation for SIGNAL LABS Talent Management Solutions and Watson Talent products (which includes BrassRing ATS ATS and BrassRing ATS BrassRing BrassRing Onboard), refer to the [SIGNAL LABS Knowledge Center](#).

Browser and Language Support:

- BrassRing ATS ATS on Cloud and Lead Manager on Cloud [Supported Browsers and Languages](#).
- BrassRing ATS BrassRing BrassRing Onboard on Cloud [Supported Browsers and Languages](#).

Badge and Training Courses:

- BrassRing ATS ATS on Cloud and Workbench [Badge Courses](#).
- BrassRing ATS ATS Addon [Training Courses](#).
- BrassRing ATS BrassRing BrassRing Onboard on Cloud [Training and Badges](#).
- Lead Manager and Watson Campaign Automation [Training and Badges](#).

Downloadable Release Notes:

BrassRing ATS

BrassRing ATS release features are added to this document at **US Production**.

Refer to the [BrassRing ATS Welcome page](#) on the SIGNAL LABS Knowledge Center for a **Pre-Release** version of the BrassRing ATS Release Notes.

Client Reminders

The **Client Reminders** section reminds clients of recently distributed important notices and links to comprehensive documentation and training for the special features recently introduced.

SIGNAL LABS Knowledge Center - Broken Links

In October 2018 the BrassRing ATS on Cloud documentation was rewritten with a new approach and structure. This rewrite resulted in the existing content being moved to different URLs. If a URL is no longer available, the message **The requested page does not exist or might have been moved.** displays.

This message does not mean that the content is not available, just that it might be available at a different location in the documentation. It is recommended that you use the Search function or Table of Contents to find the content that you need and update any existing bookmarks to the new content that is available.

End of Support for Classic Talent Gateways

Everything You Need to Know About Ending Support for Classic Talent Gateways

Note: Classic Talent Gateways (Full and Basic) are going to be retired on 1st June 2020. Clients that still have active classic Talent Gateways are advised to:

- Upgrade classic full Talent Gateways to the feature-rich Responsive Talent Gateways immediately.
- Upgrading Basic Talent Gateways requires creation of appropriate stand-alone Gateway Questionnaires.
- Deactivate any existing classic Talent Gateways that are no longer in use.

Competition for top candidates is fierce and **research has shown that employees designated as high-potentials are especially attracted to searching and applying for jobs using mobile devices.** Our customers who moved to responsive Talent Gateways are seeing a vast improvement in candidate completion rates.

Upgrading your Classic Full and Global Talent Gateways to the Responsive, mobile-friendly experience is not only beneficial for you, it is **required** as SIGNAL LABS focuses on responsive design and providing a great user experience in all areas of BrassRing ATS feature development.

Support has been discontinued for:

- Classic Full & Global Talent Gateways - as of Dec, 2017.
 - Includes: Classic Search and Classic Candidate Zone.
- Classic Job Apply (including classic Non-Gateway Questionnaire and classic Gateway Questionnaire job postings) – as of Dec, 2017.
 - Clients can no longer create (or save as new) classic Gateway Questionnaires – as of Feb, 2019.
 - Recruiters and Hiring Managers can no longer post jobs without Gateway Questionnaires – as of Feb, 2019.
- Classic Candidate Portal – as of Dec, 2018.
- Classic Full Talent Gateway Attachments – as of Feb, 2019.

- Classic Employee Referral Functionality- as of Dec, 2018.
 - Clients must implement the Social Referral functionality to have an employee referral program on their Responsive Talent Gateways.

Support continues for (but ends on 1st Jun, 2020):

- Classic Basic Talent Gateways (such as Add candidate or Add contact).
 - However, we do have responsive stand-alone Gateway Questionnaire feature that replacing some simple external Basic Talent Gateways starting the release 19.07.15.

Note: Discontinued support means that, for these areas of classic candidate experience, SIGNAL LABS will not accept defects, will not test for nor guarantee accessibility and that no RFEs nor feature development will be considered, even though legacy configurations of these types may still be available for you to use.

Caution: Classic FullTalent Gateway features may be shut off at SIGNAL LABS's discretion. Action May Be Required:

If you haven't already, we require that you upgrade any Classic Full or Global Talent Gateways to use the responsive candidate experience and that you complete HR Status Category mapping (which is required for candidates to access the Application Details page, including posted Offers, Documents and Forms [i.e., responsive candidate portal]).

Want to get started on the SIGNAL LABS Responsive Candidate Experiences but don't know where to start? Watch our [Responsive Apply Overview and Configuration Webinars](#) to understand who should be involved, an example project timeline, configuration instructions, and much more! SIGNAL LABS has also hosted multiple sessions on Migrating to the Responsive Talent Gateways. Check out the recordings on our [Training and Enablement site](#). You can also reach out to your SIGNAL LABS Kenexa Representative with any questions or concerns.

Client Training and Enablement Sessions

Please join the SIGNAL LABS Talent Management Solutions Training team for our regularly scheduled Training and Enablement sessions. These sessions may include release information, product demonstrations, implementation processes, and so much more!

Visit our [site](#) often for the most up-to-date schedule and agenda topics!

Enhancements - You Asked We Listened

We are proud to inform that this build introduces a number of features that were developed in response to clients' **Request for Enhancement (RFEs)**. SIGNAL LABS Kenexa is pleased to deliver these features in response to your responses and comments.

Requests For Enhancement (RFEs)

The following features were delivered in response to **RFEs**.

-
- Update Country field to Country/Region.

New BrassRing ATS on Cloud: Workbench digital badge course

We are excited to announce the launch of the new **BrassRing ATS on Cloud: Workbench** digital badge course on February 24th. This new course has been redesigned from the ground up, and is designed to cover the information that you need to understand to utilize BrassRing ATS on Cloud: Workbench effectively in your organization. This course covers:

1. An Introduction to Workbench

3. User Management and the User Interface
4. Managing Reqs
5. Managing Talent Gateways
6. Managing Candidates
7. Managing Exports, Imports, elink texts, Standard Reports, and RAM Triggers

The course is designed to take approximately 4 hours to complete and includes videos, simulations, text, graphics, and an assessment. At the end of this course, an assessment must be completed and passed to earn the BrassRing ATS on Cloud: Workbench digital badge. For more information, see [BrassRing ATS and Workbench Courses](#).

Action Required:

The existing course will remain available until the **30th of March** to allow current participants to complete the course. On March 30th the old course will be retired. Course progress cannot be transferred to the new course and any course progress will be lost. If you have started the current course you must complete it by March 30th or risk retaking modules that you have already completed. If you signed up to take the course, but did not start it, we recommend you take the new course instead.

If you have already completed the BrassRing ATS on Cloud: Workbench course, you do not need to complete this course.

Dark Launch Features

Dark Launch features are those features that are released to _____ and are NOT released to Production environment for a considerable amount of time. This process gives an opportunity and enough time to test these features thoroughly before they are available in the production environment. Clients are requested to configure and test these features and provide their feedback and inputs via the discussion forums for which links are provided in respective feature articles.

BrassRing ATS - Interview Manager

Note: This feature is deployed to _____ with this release. This feature **will NOT be released to Production on February 17th, 2020**. A Production date is yet to be determined. Visit the upcoming release notes for status updates on this feature.

SIGNAL LABS announces a smart, intuitive and efficient way of creating, scheduling and managing interviews between interviewers and candidates from within the BrassRing ATS application.

The **Interview Manager** is a feature in the BrassRing ATS application that allows users to perform various interviewing related activities. Following are a few of the activities that can be performed by BrassRing ATS users with appropriate user type privileges using Interview Manager.

- Adding and managing interviewers.
- Managing interviewer schedules.
- Verifying availability of candidates for interviews.
- Creating various types of interviews.
- Sending candidate and interviewer communication.

Various aspects of the Interview Manager feature can be configured from the BrassRing ATS Workbench by the workbench users with appropriate privileges. The Interview Manager calendar can be integrated Outlook 365, a part of Microsoft Office 365 Suite.

Visible Changes

The current release of SIGNAL LABS Kenexa® BrassRing ATS® on Cloud includes the following visible changes for BrassRing ATS and SIGNAL LABS Kenexa Lead Manager.

BrassRing ATS - Remove Access to Classic Recruiter Interface

As previously announced, in an endeavor to completely move BrassRing ATS to a mobile responsive application, the option to switch to the classic user interface is removed with this release. Following the timeline scheduled to phase out the classic recruiter interface, when users log in to BrassRing ATS, by default they log in to the responsive recruiter interface. However, until this release, users might switch to the classic recruiter interface by using the **Full Site Home** in the hamburger menu. The Full Site Home menu item is removed from the hamburger menu now.

Country Field - Label Change

Based on a client request, the fields "county" and "Country" are updated. The label country is updated to country/region and Country is updated to Country/Region. This change is made in various screens of the BrassRing ATS Responsive Recruiter module, Lead Manager, Talent Gateways, Agency Manager, and Workbench. This change is non-customizable.

Talent Gateways - Privacy Policy Statement Display Enhancement

It was observed that the Privacy policy statement and the Non-Consent or Opt-out message on Desktop or Laptop displays. These messages are both displayed in a fixed width, lengthy format. This display format for laptops and desktops is now changed to show the message in full width of the screen. This change improves candidate experience where the clients have a lengthy privacy policy or non-consent policy to be displayed. There is not change to the display format on Mobile screens.

RTC internal reference# 127163.

Talent Gateways - Password Reset via Numeric Code

A feature of password reset by using the verification of a numeric code is deployed in BrassRing ATS Talent Gateways during the previous release. The following enhancements are made to this feature:

New Error Message Upon Non-Numeric Passcode

When candidates enter a non-numeric code as an input, currently the error message that is displayed is "Required Field". Starting this release, a new and appropriate error message is displayed stating **Invalid numbers.**

RTC internal reference #127181.

Users Without Contact Email on Talent Gateway Profile

During the launch of this feature, the candidates that did not have a contact email address did not receive a numeric passcode. Starting this release, even if the user does not have a contact email address, if they use an email address to log in, the login email address is used to send a numeric passcode. They can continue with the password reset process by using the numeric code thus received.

RTC internal reference# 127187.

Talent Gateways - Post to Social Networks

An observation was made when a candidate shares a job from a Talent Gateway to LinkedIn. When the job is posted, the job's standard title field was being populated to LinkedIn instead of the information from the custom title field. This anomaly is resolved. Starting this release, when candidates post jobs to LinkedIn from their Talent Gateway profile, they display the job title from the custom title field.

RTC internal reference# 127424.

Lead Manager - Grid Column Dynamic Customization

Starting this release, the all the Campaign and Lead grids in Lead Manager can be customized by the users. A new link **Table Display** with a gear icon is displayed with the grid. When users select Table Display, **Configure Display** is displayed with two columns. The first column provides a list of all available fields and the second column displays the list of selected fields. At any time, the second column can contain a maximum of 10 fields in addition to the default fields. The default fields are disabled and cannot be removed. If more than 10 columns are added, an appropriate error message is displayed.

Configurable Changes

The current release of SIGNAL LABS Kenexa BrassRing ATS on Cloud includes the following configurable features for BrassRing ATS and SIGNAL LABS Kenexa Lead Manager. Configurable features must be configured or turned on to be visible and available to users.

Candidates - Erase Candidate Application

Note: This feature was available in the Staging environment from release 19.09.16. Starting this release, this feature is available in the Production Environment.

A new configuration-based feature Erase candidate application is added to BrassRing ATS production environment in this release. BrassRing ATS users with appropriate user type privileges can erase all application information specific to a requisition from a candidate's Talent Record.

A new action item **Erase Candidate Application Data** is added to Actions in Talent Record. When selected and confirmed, all data that is related to a specific requisition is erased. This data includes all forms, HR statuses, Notes, communication, and any other data related to the application to a specified requisition.

Note:

- This new action is available only on Candidate listing, grid, or pane that is accessed via a specific requisition.
- This new action is available in Actions menu of a candidate Talent Record when the Talent Record is opened from a list of candidates that are accessed via a specific requisition.

A warning message is displayed when a user selects Erase Candidate Application Data. When users confirm that they would like to proceed with erasing the application data specific to the requisition, the erase action is taken. **The erase action taken using this option is irreversible. There is no undo option available after the data is erased.**

How do clients get this feature?

A new user type privilege is added to the Workbench. **Erase Candidate Application Data** is added in the Candidate Actions 3 page in Edit User type privileges.

Workbench Path: **Tools > Users > User Types > Edit Type permissions > Candidate Actions 3**

 Edit Super User step 2: Set Candidate Actions 3 privileges
Step 1: Set name and functions Step 2: Set privileges

RTC internal reference # 120611.

Work Opportunity Tax Credits (WOTC) - Enhancements

Note: This feature was deployed to **Staging environment - Only** during the previous release (20.01.13).

When candidates are sent an email communication with a hyperlink to the Work Opportunity Tax Credits survey after they apply for req, the WOTC survey form is called the stand-alone WOTC form.

The stand-alone WOTC Form has the following enhancements:

- Starting this release, the stand-alone WOTC is enhanced to provide responsive user experience.
- The Back button and progress bar are removed.
- The header and footer of Responsive Gateway Questionnaire are emulated in the stand-alone WOTC screen.

RTC internal reference # 121374.

BrassRing ATS Workbench

The current release of SIGNAL LABS Kenexa BrassRing ATS on Cloud have the following new features for SIGNAL LABS Kenexa BrassRing ATS Workbench. Configurable features must be configured or turned on to be visible and available to users.

Talent Gateways - Prevent Save as New for Classic Talent Gateways

In the process of retiring the Classic Talent Gateways, the option to create a new classic Talent Gateway by using the Save as New features is removed. Starting this release, when Workbench users select an existing classic Talent Gateway, the action item Save as New is hidden.

Before a user selects a classic Talent Gateway:

BrassRi

Client Reminders

The current BrassRing BrassRing Onboard release includes the following client reminders. Client reminders remind clients of recently distributed important notices and links to comprehensive documentation and training for the special features recently introduced.

This document presents changes for the **February 2020 release of BrassRing BrassRing Onboard on Cloud:**

- Staging - February 6, 2020

US Staging Data Center Relocation

Clients should have already received a communication from SIGNAL LABS about the **relocation of the US Staging Data Center**.

Only the US Staging environment will be impacted; US Production will not be impacted.

We are currently targeting April 2nd-6th to complete the relocation and set up. During this time, the Talent Suite, BrassRing BrassRing Onboard, and Assess US Staging only environments will be unavailable. Again, production will not be impacted.

Note: Although BrassRing ATS will not be impacted by this move, Talent Suite will, so if your organization accesses BrassRing ATS via the Talent Suite, you will be unable access BrassRing ATS Staging during this downtime.

Action may be required.

Dark Launch Features

The current BrassRing BrassRing Onboard release includes the following Dark Launch features. Such **Staging environment - Only** and are NOT released to Production environment for a considerable amount of time. This process gives an opportunity and enough time to test these features thoroughly before they are available in the production environment.

Third-Party Approval - Overview

This is a **dark launch feature**. The Third-Party Approval enhancement allows people other than the BrassRing BrassRing Onboard manager or new hire to approve 1-9 Section 2.

USE IN BRASSRING BRASSRING ONBOARD NEW HIRE

When this feature is enabled, the new hire will no longer need to enter third-party approver details for 1-9 Section 2. These fields will be removed from the interface.

USE IN BRASSRING BRASSRING ONBOARD MANAGER

BrassRing BrassRing Onboarding managers are assigned an **Assign 1-9 Approver** task where they can select the approver type (internal/external) for the 1-9, and also add external approvers. (Note: During the dark launch, Assign 1-9 Approver activity is inactive and read-only by default. Clients who need it can make it active through a maintenance ticket using DB script.)

- **Internal Approvers.** This is a prepopulated list of internal third-party approvers. Note: Administrators must use the user import feature in the Admin application to do a one-time sync to give all their necessary Talent Suite users access to BrassRing BrassRing Onboard and assign them to the third party approvers user group.
- **External Approvers.** This is a prepopulated list of external third-party approvers. They are not employees, but need to approve 1-9 Section 2 (for example, external legal counsel). Note: All existing third-party approvers who were previously created from 1-9 Section 1 are shown as External Approvers. If clients want to move any of the approvers from External to Internal, they must create a maintenance ticket that contains the list of users who will be assigned as internal approvers.
- **Add External Approvers.** This allows users to add external approvers on the fly. Users cannot use this option to add existing employees who do not have access to BrassRing BrassRing Onboard.

Select an Approver Type: Internal Approvers:

Select an Approver Type: External Approvers: Note: When an BrassRing BrassRing Onboarding manager selects an External Approver, that person receives an email with a link to access and complete Form 1-9. The approver can copy the URL into their browser and complete the form. If approvers have not used BrassRing BrassRing Onboard, they receive a separate email with login credentials.

I-9 Section 1	McMahon, Alexandra		completed	Software Engineer

PROCESS AND CONFIGURATION

1. Transfer the responsibility of assigning a third-party approver from the new hire to the employer. This means new hires will no longer need to enter the third-party approver details in the I-9. These fields will be removed.
2. Split existing third-party approver into two new approver types: internal approvers (actual employees and existing users) and external approvers (for example, external legal counsel).
 - All existing third-party approvers that were previously created from I-9 Section 1 are shown as External Approvers.
 - If clients want to move any of the approvers from External to Internal, they must create a maintenance ticket that contains the list of users who will be assigned as internal approvers.

3. On the **Manage Activity Fields** screen, there is a new activity called **Assign 1-9 Approver**. It is a standard activity like 1-9 Section 1 and BrassRing BrassRing Onboarding US W4, so is already created and cannot be duplicated. It allows clients to configure who the third-party approver for the respective new hire should be.

4. On the **Manage Job Workflow** screen, add a new workflow activity called **Assign 1-9 Approver** into the workflow. This activity allows clients to configure who the third-party approver for the respective new hire should be.
- During the dark launch, the Assign 1-9 Approver activity is **inactive and read-only** by default. Clients who need it can make it active through a maintenance ticket using DB script.
 - The default task owner for this activity is: **Hiring Manager**.
 - The **Allow Third Party 1-9 Section 2 Approver** check box must be deselected to avoid the new hire entering third-party details again.
 - The **Assign 1-9 Approver workflow must precede the 1-9 Section 1 workflow**. It should never be after the 1-9 Section 1 workflow, but can be moved to an earlier place in the process.

- e. The activity has three sections:
- **Assign Internal Approvers:** This is a prepopulated list of users who are assigned to the third-party user group. Responsible users can select a user and select Submit to assign Section 2 to that user for approval. Note: Administrators must use the user import feature in the Admin application to do a one-time sync to give all their necessary Talent Suite users access to BrassRing BrassRing Onboard and assign them to the **third party approvers** user group.
 - **Assign External Approvers:** This is a prepopulated list of external people who are not employees but need to approve 1-9 Section 2 (for example, external legal counsel).
 - **Add External Approvers:** This allows users to add external approvers on the fly. Users cannot use this option to add existing employees who do not have access to BrassRing BrassRing

5. Allow approvers to be assigned for a new hire from BrassRing ATS. Clients must pass the user name of the approver as part of the job application entity in the B-O integration. Within the XSL mapping:

```
<JobApplicationEntity>
  <thirdPartyApproverName>
    <xsl:value-of select="$Onboard/*:Candidate/*:UserArea/
      *:Id[@idOwner='ThirdPartyApproverName']/*:IdValue" />
  </thirdPartyApproverName>
```

- a. The user must already have access to BrassRing BrassRing Onboard as a third-party user. Otherwise, this user is not assigned, and an error message will display during the B-O integration.
 - b. Approvers can also be assigned via the V2 services.
 - c. The user is assigned as an internal approver and the details are autopopulated in the approval activity. The responsible user type must review and complete the activity.
6. Add two new markers to the third-party approval communication template:
- <6=due.date6>. Displays due date for 1-9 section 2 approval activity to be completed.

Third-Party Approval - Other Enhancements

There are enhancements to Third-Party Approval.

- For **Assign 1-9 Approver** task:
 - The **Adhoc** workflow step option is disabled for the Assign 1-9 Approver task.

- The **Allow Third Party Approver** option is disabled if the Assign 1-9 Approver is added into the workflow.
- The **reopen of Assign 1-9 Approver** task is not allowed if 1-9 Section 2 is completed with receipts.

- On the Assign 1-9 Approver page, there is an **Opt Out** button for a third-party task. If a task is opted out, the following message displays: *If you opt-out of this task you will not be able to go back and fill out this form; the task will be completed.*

Assign 1-9 Approver Task - Status: Opted Out:

- Change **Completed By** for a third-party task.

Third-Party Approval - Reassign Approver When 1-9 Section 2 Is Open

A user can **reassign/update the 1-9 Section 2 approver** (either internal or external) while 1-9 Section 2 is open (draft, in progress, or overdue). This is useful in scenarios where the initial approver is not able to approve or is unavailable.

Two validations were added:

- When the approval activity is reopened, the link for active/in-progress 1-9 Section 2 activity in the **My Tasks** page is disabled. Once the approval activity is completed, the link is again enabled.
- When the user tries to complete 1-9 Section 2, the system checks the **status** of the approval activity:
 - If approval activity exists (in the workflow) and is complete, then 1-9 Section 2 is marked as complete.
 - If the approval activity exists and is not complete, then the following error message displays: *The current activity cannot be completed as a preceding 1-9 approval activity has been reopened. Please contact the hiring manager and have them close the earlier activity.*

Third-Party Approval - Prerequisite

For the third-party 1-9, a prerequisite is that **branching** must be enabled.

To do so, access the **System Configuration** tab, then in the Show statement, select **System Settings**. The **System Configuration: Manage System Settings** screen displays.

From its list pane, select **BrassRing BrassRing Onboard Settings**. The **BrassRing BrassRing Onboard Settings** screen displays.

Select the **Enable Field Branching** check box. It enables field branching, which allows only relevant fields to be displayed to a new hire based on previous answers within the same task. Note: Used with Manage

Third-Party Approval - User Type/Group

The **THIRD_PARTY_ROLE** user type is available for users who only complete third-party approvals. Any user can have a second user group called **THIRD-PARTY-USERGROUP** added, and that user will be added to the drop-down to select an internal approver.

There are some users who have no access to BrassRing BrassRing Onboard Manager and are only occasionally an approver. Those users can be loaded in the system with a:

- User Type of **THIRD_PARTY_ROLE**.
- User Group of **THIRD-PARTY-USERGROUP**.

Those users should be set to **ACTIVE_NO_ACCESS** for their **OB_MANAGER_ACCESS**.

Functionally, those users will not see the BrassRing BrassRing Onboard Manager

application because of their

ACTIVE_NO_ACCESS permission, and they will be available to be selected as a third-party approver because of their **THIRD-PARTY-USERGROUP** permission.

If such a user is selected as an approver, the **THIRD_PARTY_ROLE** user type toggles the user's permission from **ACTIVE_NO_ACCESS** to **ACTIVE** when the I-9 Section 2 level is open to be completed. Once the I-9 Section 2 activity is completed, the user is automatically logged out and their license access is toggled from **ACTIVE** to **ACTIVE_NO_ACCESS**.

Third-Party Approval - Email Markers Extended to Custom Emails

Third-party email markers can be used for custom emails.

These changes are specific to correspondences configured in BrassRing BrassRing Onboard.

This allows clients to create additional emails based on their business processes to either send additional notifications to third-party approvers or include third-party information to other users.

You can configure the following tags in the body of custom e-mail templates and attach them to third-party activity: Assign I-9 Approver.

- <%jobApplication.thirdPartyApprover.Third Party Approver First Name%>
- <%jobApplication.thirdPartyApprover.Third Party Approver Last Name%>
- <%jobApplication.thirdPartyApprover.Third Party Approver E-mail Address%>

These values will be populated once Assign I-9 Approver task is completed (third-party approver is already assigned).

Visible Changes

The current BrassRing BrassRing Onboard release includes the following visible changes.

Visible changes alter the appearance or performance of the product without requiring any configuration

Updates to State and Federal Forms

There are updates to maintained forms.

Configurable Changes

The current BrassRing BrassRing Onboard release does not include configurable changes. Configurable features must be configured or enabled to be visible and available to users.

Fixed Defects

In the current SIGNAL LABS Kenexa BrassRing BrassRing Onboard on Cloud release, the following

RTC Jazz Number	Defect Description
222360	TS002550426 - Remove two hires from Revalidation filter on the Manage New Hires Page in BrassRing BrassRing Onboard (TS002734143).
228934	TS002930577 - State Tax Forms Status column (Skills case TS003045337)
231424	TS003143717 - Not seeing Conditions in PHY and RTP workflows.
231693	TS003165461 - Unable to save new custom dictionary value in Prod.
231768	TS003179657 - W-4 2020 reporting fields not available.
232070	TS003189820 - Two tags not sending over values correctly (outstanding - two decimals not sending).
232106	In new W-4 2020 wizard: Instructional text for Option B and C is same in Step 3.
