BrassRing June Release

BrassRing new features for release 23.06.06 are listed here

BrassRing_Client_Reminders

The Client Reminders section reminds clients of recently distributed important notices and links to comprehensive documentation and training for the special features recently introduced.

BrassRing Dark Launch

Dark Launch features are those features that are released to the Staging environment only and are NOT released to the Production environment for a considerable amount of time.

This process gives an opportunity and enough time to test these features thoroughly before they are available in the production environment. Clients are requested to configure and test these features and provide their feedback and inputs to your respective Infinite representatives.

There are no Dark Launch features in this release.

BrassRing Visible Changes

The BrassRing visible changes for the current release are listed here.

There are no visible changes in this release.

BrassRing Configurable Changes

The BrassRing configurable changes for the current release are listed here.

There are no configurable changes in this release.
